Summary

B.Tech Computer Science graduate skilled in Java, Python, SQL, and full-stack web development using React and Django, with a foundation built through DSA, OOP, and System Design coursework. Solved 100+ LeetCode problems and built 3+ full-stack applications during academic projects and internships.

Education

B.Tech, Computer Science & Engineering

Sep. 2022 – May 2026

Amity School of Engineering and Technology (ASET), Amity University, Haryana

Cumulative GPA: 8.56/10

Technical Skills

Languages Frameworks & Libraries: Java (OOP), SQL, Python, Django, Django REST Framework, React, Vite, Tailwind CSS

Databases: MySQL, PostgreSQL, Redis

Tools & Platforms: Git/GitHub, VS Code, Docker, Docker Compose, Vercel, Render

Core Competencies: Data Structures, OOP, REST APIs, System Design, DBMS

Experience

Elevate Labs (Skill India – Ministry of MSME)

June 2025 – July 2025

Java Developer Intern

- Engineered a full-stack expense management system (Java, MySQL, JavaFX, MVC architecture) with wallet management and real-time balance updates across 6 normalized tables.
- Designed line and pie chart components in JavaFX to render monthly expense trends across 5+ spending categories.

TechSaksham Program (Microsoft & SAP, Edunet Foundation)

Jan. 2025 – Feb. 2025

AI Intern

- Trained and evaluated ML models across 3+ case studies in Python, covering data preprocessing and training.
- Streamlined Git version control with 3 commits across 3 AI projects for reproducible experiment tracking.

Projects

Candidate - AI

- Developed an AI-powered candidate representative using Python, FastAPI, React, and Groq with 6+ AI capabilities including profile Q&A, job-description matching, interview-question generation, and candidate suitability analysis.
- Reduced AI response rendering latency by 66% by eliminating character-level streaming delays and rendering response chunks immediately.

URL - SHORTENER

- Built a full-stack URL shortener with React.js (Vite) frontend and Django REST Framework backend, featuring custom alias generation, URL redirection, and expiry-based link management (7–30 day configurable expiry).
- Implemented click analytics tracking 3 metrics (clicks, timestamp, source) and QR code generation for each shortened URL.
- Integrated Redis to cache URL lookups, reducing redirect response time by ~70%; built RESTful APIs with PostgreSQL and containerized the stack with Docker Compose.

Certifications

- SAP ABAP Programming for Beginners - Udemy
- Software Engineering Job Simulation - JPMorgan Chase & Co.
- Software Development Essentials - Microsoft and LinkedIn
